

Procuring Lab Products Just Got Easier

Announcing our newest nationwide cooperative contract!

For over 120 years, Thomas Scientific has provided the latest in equipment and supplies to the science community.

We carry an extensive catalog of laboratory consumables, chemicals and reagents, and equipment. You can choose Thomas Scientific with confidence every time you are looking for value, quality, and reliability.

CONTRACT # 020723-TMS

www.thomassci.com

- Laboratory supplies
- Laboratory equipment and instruments
- Analytical chemicals
- Controlled environment supplies
- Safety and PPE supplies

Contract valid until 10 April 2027

OUR MARKETS

- Education
- Public Health
- Water & Wastewater
- Environmental Analysis
- EMS, Fire, HazMat
- Emergency Response
- Corrections
- Medical Examiners
- Public Safety
- Crime Scene & Forensics

We offer more than 1,000 brands including the following premier names in laboratory supplies and equipment:

Municipal Water and Wastewater Testing

Thomas represents trusted and well-known suppliers of water collection and analytical testing products to be used in the field or on the bench. With our portfolio, you can test your water supply for more than 100 parameters to ensure you are adhering to local and federal regulations.

Common Testing Parameters

- Chlorine
- Conductivity
- Fluoride
- Hardness
- Lead
- Nitrate/ Nitrite
- pH
- TDS
- Turbidity

Products

- pH Meters
- Colorimeters
- Spectrophotometers
- Turbidimeters
- Standards and Solutions
- Reagents
- Testing Kits
- Samplers

Lovibond® Water Testing

Simplify your water analysis with Lovibond®

MD100 Series Single Parameter Colorimeters

Rugged, waterproof colorimeters ideal for field testing. Pre-programmed with multiple testing ranges and offers the flexibility to choose between different reagent platforms.

TB350 Portable Turbidimeter

Ideal for field and environmental testing, the TB350 turbidimeter delivers the most reliable measurements for low range to high range samples without sacrificing accuracy.

XD7000 Series Spectrophotometers

State-of-the-art optical system combined with ease-of-use and flexibility. Ideal for the laboratory, these instruments are pre-programmed methods for over 150 water quality parameters and ranges.
